# Safe Betting

Team Legend

Aysha Hakeem, Hafsa Irfan, Lixy Cyril, Riya Jha

Stella

- Stella is a 24-year-old working woman, the only earning member in her family. Stella's family relies on Stella for financial support.

- At times Stella is exhausted from her busy work and wants to do something different to get out of her daily responsibilities. Stella seeks help from friends.

- Stella's friends gamble quite often and asks her to join to have fun. Stella decides to join in as she thought she can trust her friends.
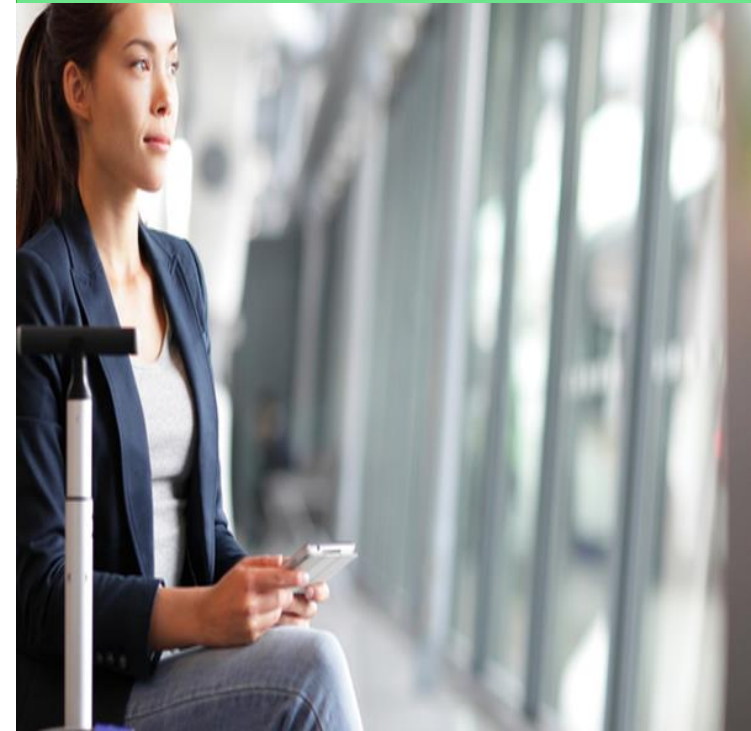

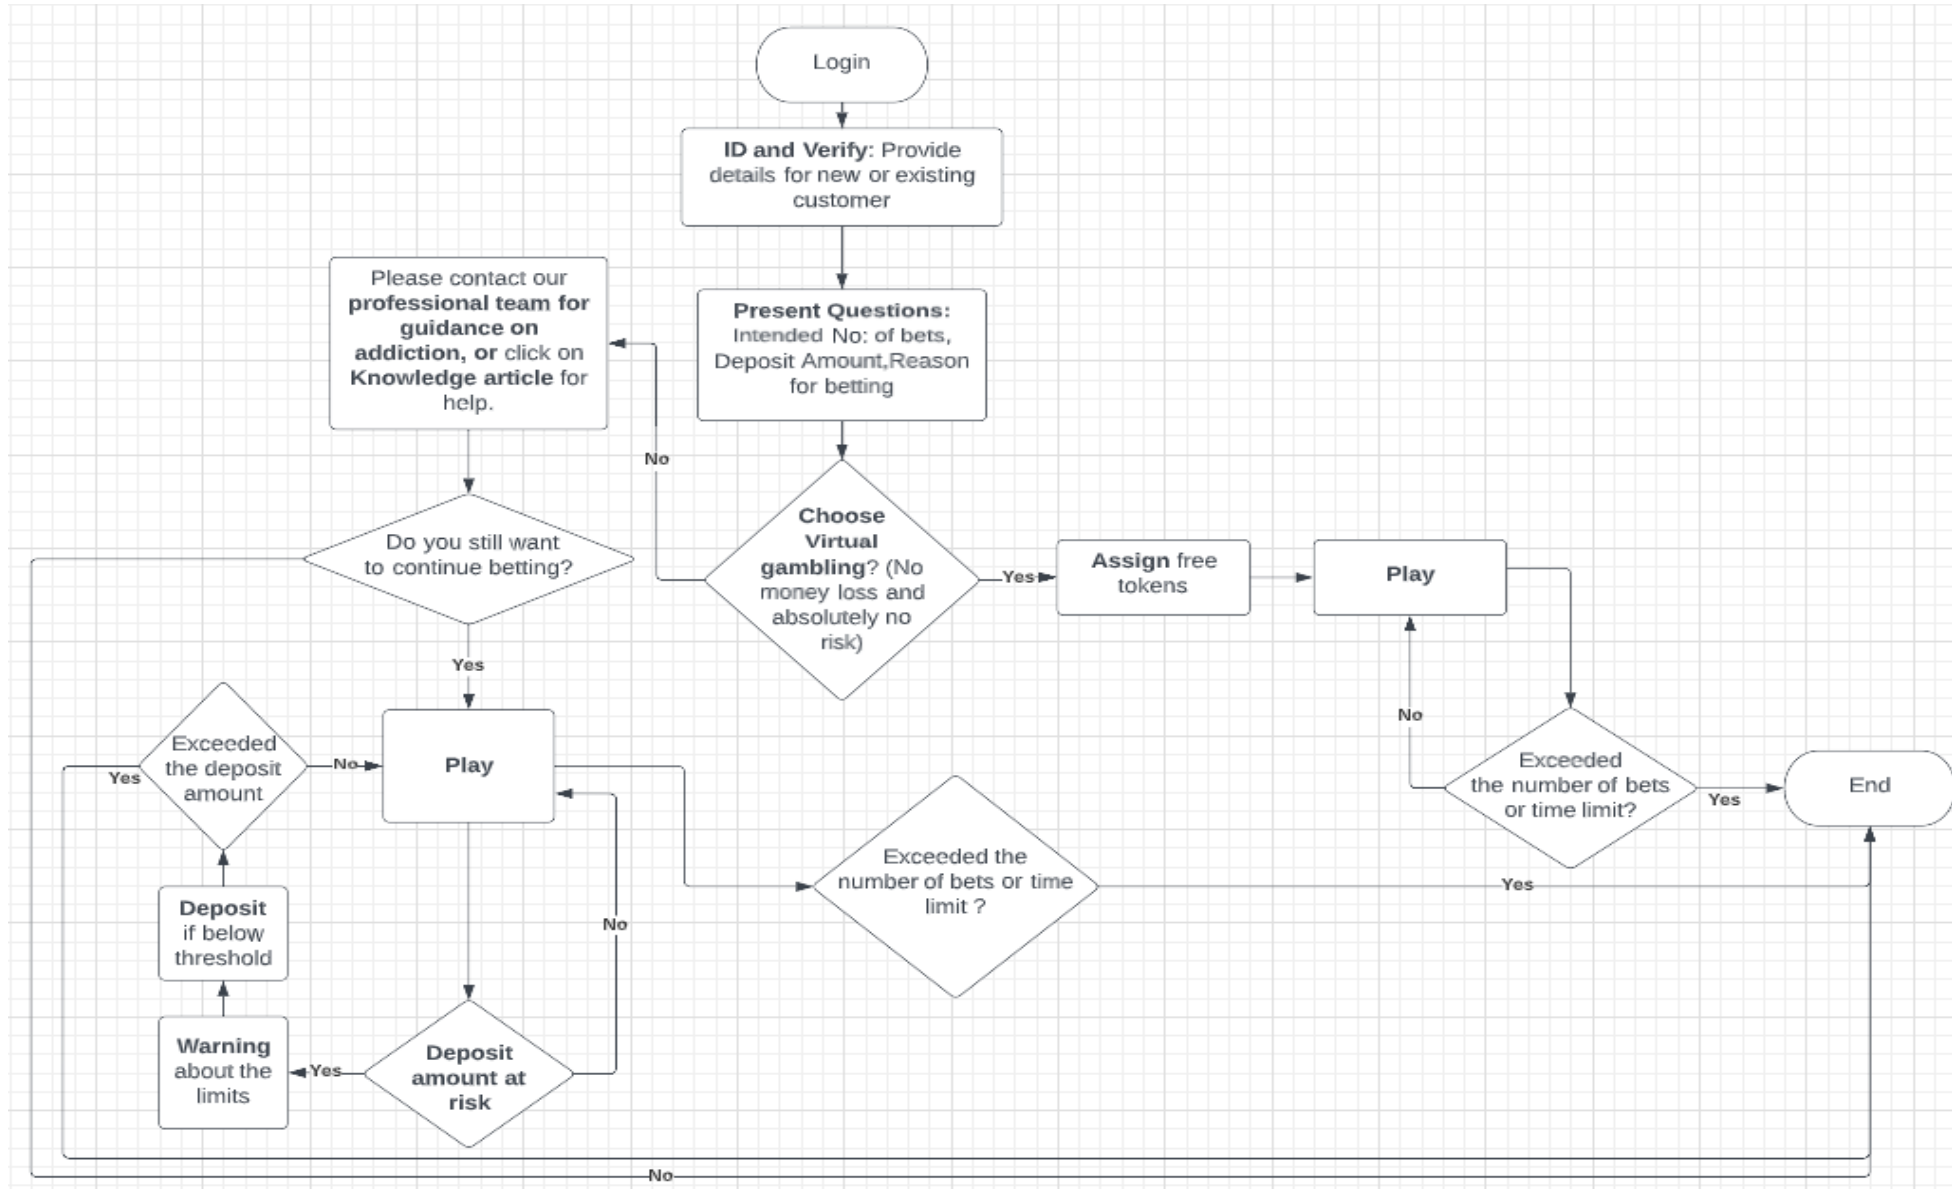

Problem statement

- Stella's decision to join her friends to gamble will affect her life in the long run, if she continues to take more financial risk.

- Since Stella's friends invited her, she doesn't realise the fact that this could end up in an addiction, which in turn could affect her mental health. This will also impact her family due to the financial risk she is undertaking.
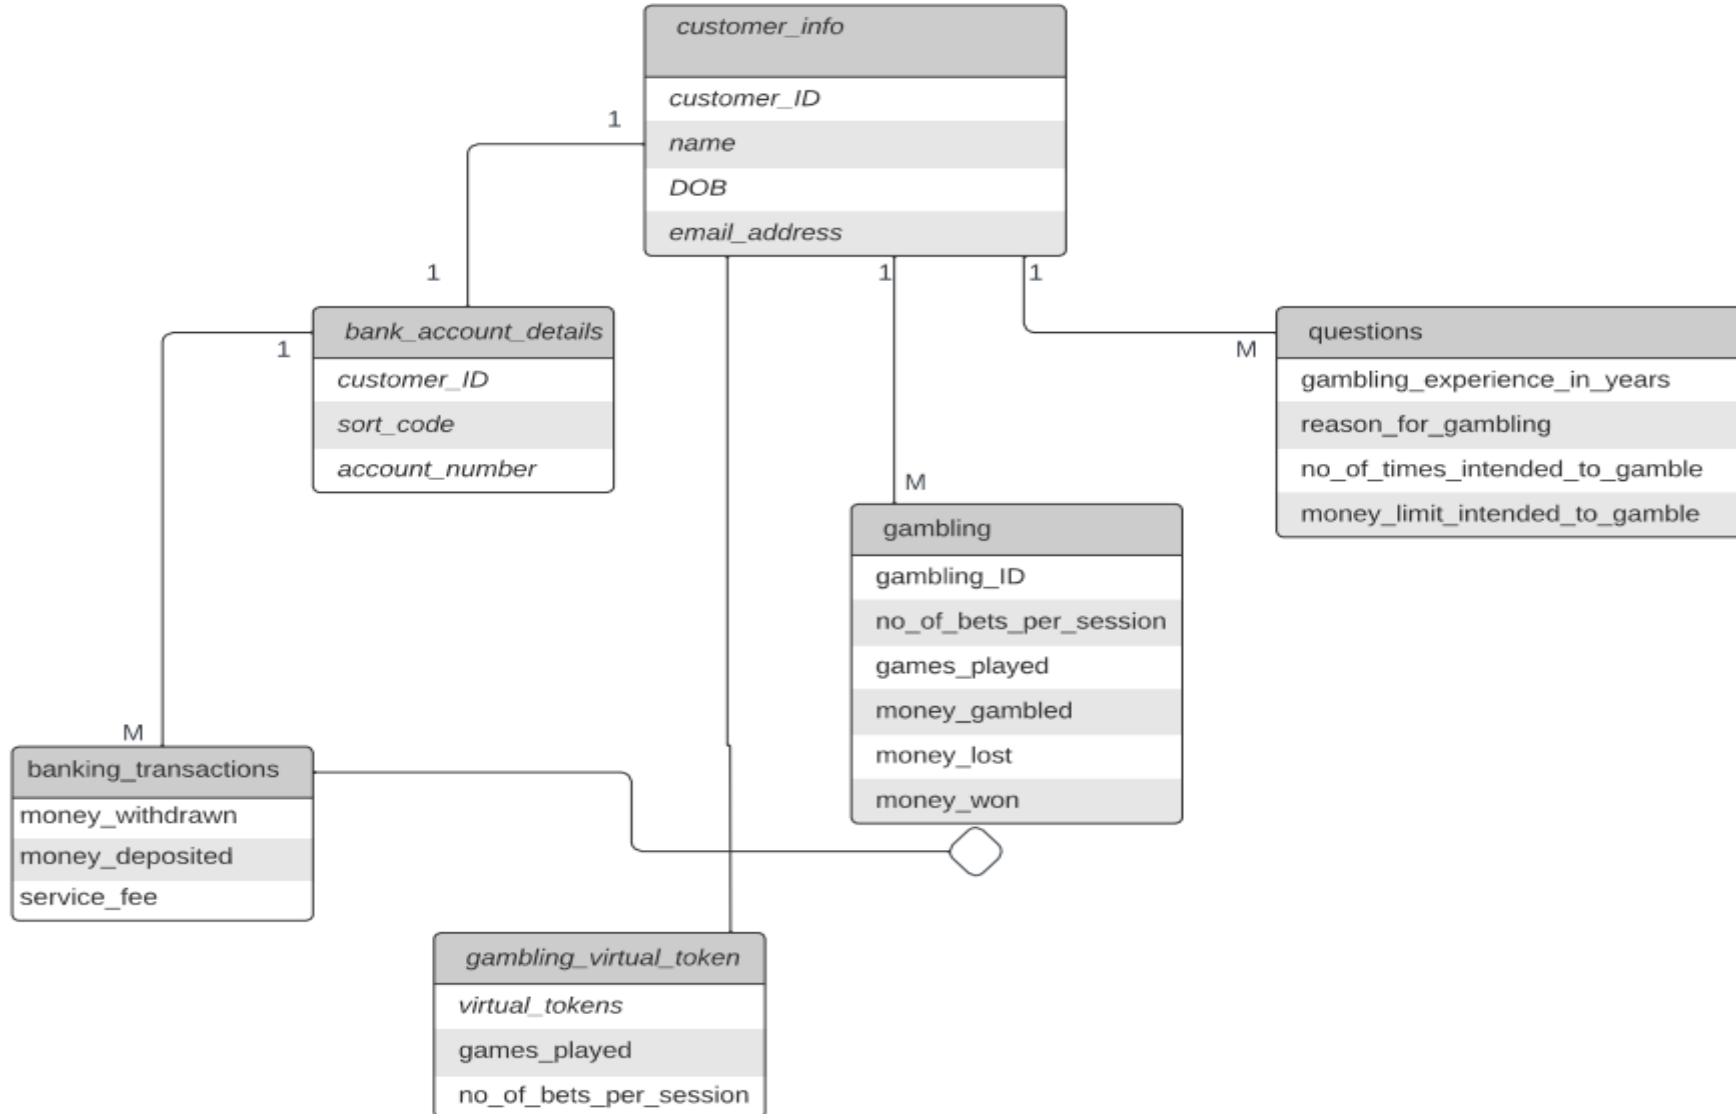

- How can we help Stella ?

Ways for Safe Betting

- Our team did a brainstorming session to think about the possible ways of providing safer betting experience for Stella.

- We think if we provide the option for Virtual gambling wherein there is no money loss or financial risk involved, this will allow Stella do something different and be satisfied.

- We also thought that some gamblers may not think this is the way forward and still want to do go ahead with the gambling in which case we will offer them a professional mentoring group who could help them come out of addiction, depending on the situation. Or if they are hesitant to talk to a group, they could go through our knowledge article that will provide the help they need and guide them in the right direction.

- In spite of the above if the decision is to go ahead, we will impose limits when they go beyond the allowed number of games or exceed the deposit amount or exceed the time limit of the game.
